

# Metal Presentation

Create and present a Google Slides presentation about your metal. Focus on the ores where it is found, how it is mined, and its everyday uses. Follow the rubric below for grading.

Your Name \_\_\_\_\_

Your Metal \_\_\_\_\_

## ★ Title Slide (5)

- Includes your name
- Includes the name of your metal
- Includes a picture appropriate to the presentation

## ★ Informational Slides (10)

- At least 5 information slides (maximum of 10)
- Information on every slide is on topic and appropriate
- At least one pictures per slide that is related to the text on that specific slide
- Slides have different transitions
- At least three items in the presentation are “animated”

## ★ Other (5)

- Correct Grammar and Spelling
- Visually Appealing and Readable

## ★ Information (40)

- From what ores is your metal found?
- Where in the world is/was your metal found?
- By what process is your metal separated from its ore?
- What are the properties of your metal?
- What are the practical, everyday uses of your metal?

## ★ Presentation (40)

- Speak clearly
- Speak at an appropriate volume
- Be serious
- Discuss all information from slides
